

Feature toggles

Each block below exercises one toggle from the features request field. Turn them off and watch the page change.

Smart typography: “quotes”, – dashes, ... ellipsis (smart_typography).

```
// syntax highlighting (highlight)
export const total = (lines) => lines.reduce((sum, l) => sum + l.amount, 0);
```

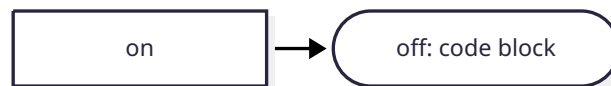

☐ A clickable checkbox (tasks)

☒ A checked one

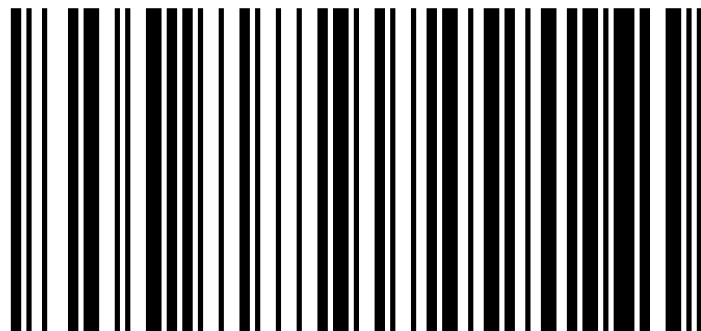

Emoji: 🚀 and 🎉 (emoji).

Math: $\sum_{k=1}^n k = \frac{n(n+1)}{2}$ typeset, or left as source (math).

A diagram, vector art with mermaid on and the source as a code block with it off:

A barcode (barcode) and an SVG icon (svg):

TOGGLE-01

An embedded image (images), shown as its alt text with the toggle off:

An HTML block (html_blocks): **styled with inline CSS**, printed as source with the toggle off.

A bare address that becomes a link (bare_autolinks): <https://example.com/toggles>

An indented block (indented_code) that is code with the toggle on
and a plain paragraph with it off.
