

Images

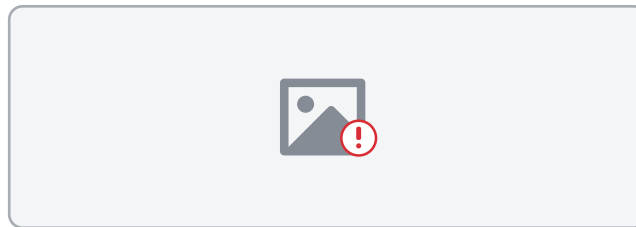

An image embedded in the document itself, as a data URI:

The same image in a table cell, next to text:

Badge	Awarded for
!badge	Ten years of service

A broken or missing image renders its alt text as a gray placeholder, so a missing file never leaves a hole:

Remote `https://` images are loaded only when the document names them, only for signed-in accounts with documents left, and are never stored. JPEG, PNG, GIF, WebP and SVG files are accepted.
