

Footnotes

Footnotes keep asides out of the flow¹, and you can have as many as you like². The marker is a name, not a number, so you can move paragraphs around and the numbering follows³.

They work inside lists and tables as well:

- A list item with a source⁴
- Another item

Measure	Value
Mean annual temperature ⁵	14.2 °C
Annual rainfall	812 mm

¹ The first footnote, with **bold** and a [link](#).

² The second one.

³ This note was written third in the source and is numbered third in the output.

⁴ Measured at the coastal station, 1991 to 2020.

⁵ The 30-year mean of daily means, per the usual meteorological convention.
